

## ABSTRACT

In a communication apparatus capable of storing an incoming-call history, the communication apparatus which has a function of deleting the incoming-call history is provided.

5      A user is urged to input setting information for setting up control of the incoming-call history, through an operation part 6 and a display part 8. A call register control setting part / call register control part 11 judges whether the incoming-call history is to be deleted or left, based on the inputted setting information, stores the incoming-call history in a memory 5 for outgoing-call / incoming-call history, and further automatically deletes the incoming-call history whose caller's phone number was not referred to by the user, in the incoming-call histories referred to  
10     by the user.
